

# Wonder Woman

---

William Marston wrote the book that first established the theory of DISC. He is also the creator of Wonder Woman.

Her powers can be shown to represent the DISC styles:

## **D Style: Magic Bracelets**

When an Amazon loses her bracelets she goes insane with rage. Additionally, if a villain fuses the bracelets together, it weakens the wearers. This fits the D style's fear of being taken advantage of and of being an independent worker.

## **I Style: Power Tiara**

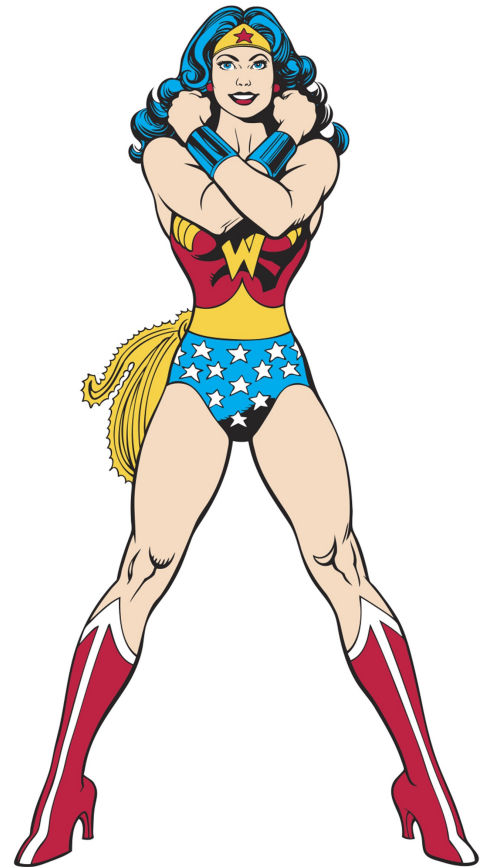

The tiara is golden and very pretty. It attracts attention, yet it can protect Wonder Woman. This fits the I style's need for social recognition.

## **S Style: Understanding & Communicating with Animals**

She takes the time to slow down and really listen. This fits the S style's ability to build strong relationships and listen to others.

## **C Style: Lasso of Truth**

When a criminal is bound with her lasso, they have to tell the truth. This fits the C style's desire to know the truth.
